

ALL LEFT OUT

KEN PRATTEN

Music is definitely a unique art form in that it is intangible and yet can change a mood or emotion in such an amazing way. Music is very spiritual, for a start because it was created by God. It can be used as a vehicle in so many good ways, and is capable of changing people's attitudes. Music is literally different vibrations traveling through the air in such a way to create different pitches and tones. What an awesome thing!
