

*The Spiritual Significance Of Music*

# DEUTERONOMIUM

**KALLE PAJU**

I don't think it is possible to understand music with just knowledge. Music is something that you have to feel. I believe God is very musical, and He gave people the talent to create music on our own. So I see music as a gift. I also see it as a wonder and a beauty, just like nature. It is something that cannot be explained because it has such a strong influence on people. Music, just like many other things, can be used for right and wrong, and because music has a strong influence on us, music can be used for good or bad. Unfortunately, many people are using this gift in a destructive way. Some do this on purpose, and some are not aware of it. But when this gift is used for good, it can bring joy and comfort to our lives, and be a real blessing for many.
