

The Spiritual Significance Of Music

BRUJERIA

JUAN BRUJO

I consider Brujeria's music as a type of Mexican Folk music mixed with Metal. Many of the songs are true stories of extreme living that few really know about yet many want to hear about them. Our songs are corridos about Mexican Metalheads doing what they love to do! Ya sabes, sex, drugs, and Rock N' Roll! Call Brujeria songs "*corrido-Metal*" because there is a story behind each one and the spirits of the stories come alive when the songs are played, especially when played loud! When the spirits are dancing, one can feel the soul return to make hearts new! Live, I feel our music could even raise the dead! Now that's the true spiritual side of music!
