

The Spiritual Significance Of Music

GUARDIANS OF HELL

MARCUS VINÍCIUS TREMONTI

Spirituality can influence my songs in two different ways. Firstly, spirituality in my compositions is the one thing connected to the sound. That is all of my spirit and everything I feel I then put into my music. Secondly, spirituality is united to the song's lyrics. This is more personal because in my instance I use all my thoughts and life philosophy into the words that I write. When I listen to a song, I can feel what it wants me to say, and that's when I write the song's lyrics. Therefore, I believe in the spiritual significance of music, because both song and lyrics, although they are separate things, they are completely united.
