

*The Spiritual Significance Of Music*

# SOULBURNER

**BERNARDO GARCÍA**

Music is the voice of the soul. It is the most effective way to communicate your thoughts and feelings despite language and cultural barriers. Music is an universal language of the soul and mind; be it love or hate, light or darkness, calm or fury, there is always a sound or a tune that transports you beyond your everyday reality into another dimension. Music is timeless, yet it reflects the mood of a specific moment in time, and is a milestone in history that can be revisited at will. As Friedrich Nietzsche said: *"Without music, life would be a mistake"*.
